80 PT

(p.14) Vernacular Architecture Practice Ceremony 04.11.2022 Facing Eachother? 70 Minutes, 6th Time.

50 PT

Encompassing a wide variety of building kinds, with the method of construction, from around the world. Represents the built majority.

32 PT

Vernacular architecture is to build outside of any academic tradition, without professional guidance. This category encompasses a wide range and variety of types of buildings, with differing methods of construction, from around the world, both historical and extant, representing the majority of buildings and settlements created in pre-industrial societies.

24 PT

Vernacular architecture is building done outside any academic tradition, and without professional guidance. This category encompasses a wide range and variety of building types, with differing methods of construction, from around the world, both historical and extant, representing the majority of buildings and settlements created in pre-industrial societies. Vernacular architecture constitutes 90% of the world's built environment, as measured against the small percentage of new buildings every year designed by architects and built by engineers.

16 PT

Vernacular architecture is building done outside any academic tradition, and without professional guidance. This category encompasses a wide range and variety of building types, with differing methods of construction, from around the world, both historical and extant, representing the majority of buildings and settlements created in pre-industrial societies. Vernacular architecture constitutes 90% of the world's built environment, as estimated in 1994 by Amos Rapoport, as measured against the small percentage of new buildings every year designed by architects and built by engineers.

11 PT

Vernacular architecture is building done outside any academic tradition, and without professional guidance. This category encompasses a wide range and variety of building types, with differing methods of construction, from around the world, both historical and extant, representing the majority of buildings and settlements created in pre-industrial societies. Vernacular architecture constitutes 90% of the world's built environment, as measured against the small percentage of new buildings every year designed by architects and built by engineers.

8 PT

Vernacular architecture is building done outside any academic tradition, and without professional guidance. This category encompasses a wide range and variety of building types, with differing methods of construction, from around the world, both historical and extant, representing the majority of buildings and settlements created in pre-industrial societies. Vernacular architecture constitutes 90% of the world's built environment, as estimated in 1994 by Amos Rapoport, as measured against the small percentage of new buildings every year designed by architects and built by engineers. Vernacular architecture usually serves immediate, local needs; is constrained by the materials available in its particular region; and reflects local traditions and cultural practices. Traditionally, the study of vernacular architecture did not examine formally schooled architects, but instead that of the design skills and tradition of local builders, who were rarely given any attribution for the work.

INFORMATION Affairs is a compact geometric serif font family with 3 styles in total (Regular, Italic as well as a Monospace cut). To be expanded with a bold weight. Affairs is a small but versatile typeface, optimized for digital and printed applications. Its geometric structure and delicate curves give it a functional but soft character, allowing it to be applied in both formal and informal settings.

FOUNDRY Soft Machine is a digital type foundry based in Apeldoorn, the Netherlands, initiated in 2017 by Open Studio. We design and distribute modern retail- and custom fonts that serve the end user and help them communicate clearly. At Soft Machine Type Foundry we produce fonts with functional and aesthetic consideration, resulting in a library of versatile typefaces. In addition to our retail fonts, we offer design solutions in the form of typeface customization, language extentions, custom characters, fonts and complete typefaces.

If you'd like to meet up, discuss a prospective project or find out more about a typeface or Soft Machine, please get in touch through the website or following e-mail address as stated on the right.

TYPEFACE Affairs Family VERSION 1.0
Three Styles Regular, Italic, Monospace.
